Description:

This course applies to persons who are required to enter confined spaces for maintenance purposes, for cleaning, inspection or other reasons. It is required by all persons who are required to enter a confined space. Participants will learn to complete hazard identifications, risk assessments and work permits for confined space operations and how to operate various confined space safety equipment. Practical entries into confined spaces will be made and practical rescue scenarios will also be covered. As defined by the Australian Standard 2865-2009 reassessment is required 'at appropriate intervals'. The industry regards reassessment on a two to three year cycle as good practice.

Content:

Specific knowledge is required to achieve the Performance Criteria of this unit, this includes knowledge of the following:

- Access and interpret information relevant to specific tasks (eg labels, MSDSs hazchem signs)
- Access and apply hazard controls
- Identify changes to conditions which may lead to the permit being revoked before the job is completed
- Describe and/or explain hazards associated with tasks covered by the permit, types of tests required for the issue of work permits - the types of tests to include, atmospheric/oxygen/ breathability, flammability/explosivity, toxicity/TWA, temperature, humidity
- Interpret and respond to gas test/monitoring results/information.
